- Led the migration from OneTrust to Usercentrics CMP across multiple WordPress sites, implementing GDPR-compliant, multilingual consent configurations with custom branding, and reconfigured Google Tag Manager and Consent Mode v2 to enforce consent-based tag firing, ensuring compliant and scalable analytics and marketing integrations.
- Architected and deployed an enterprise-grade, retrieval-augmented AI assistant as a Microsoft Teams app using Azure OpenAI (GPT-4.1) and Azure Cognitive Search. Deployed using Bicep templates, including Search, App Service, Identity, and Bot resources.
- Implemented Azure Front Door with Web Application Firewall (WAF) to enhance performance, availability, and security of front-facing websites.
- Designed and deployed schedule-based VM scaling using Automation Account, reducing overall infrastructure costs.
- Designed and deployed a self-hosted Bitbucket runner on Azure, enhancing CI/CD performance and reducing dependency on cloud-hosted runners.
- Designed and implemented an automated process to provision servers from VHD backups in Azure Blob Storage, streamlining provisioning and reducing manual effort.
- Planned and designed disaster recovery (DR) strategies for mission-critical websites to ensure business continuity.
- Built and configured cloud monitoring solutions using Azure Monitor for proactive system health tracking and alerting.
- Planned and executed server and database migrations from on-premises to Azure.
- Migrated on-premises and cloud mailboxes to Microsoft 365, ensuring seamless user adoption.
- Designed and automated server backup solutions leveraging Azure Data Factory.
- Conducted cloud architecture reviews and recommended cost-optimized, scalable solutions aligned with the Azure Well-Architected Framework.
- Oversaw the management and governance of cloud resources, ensuring compliance and cost efficiency.
- Collaborated with vendors and third-party consultants to drive system integrations and solution delivery.
- Delivered technical support and solution documentation to improve knowledge transfer and system maintainability.
